Recently the freedom of the press in Ukraine has been limited and at the same time nationalism has become more popular . Media plays an important role, especially in the conflict in Ukraine because it strongly influences the formation of the opinion of society and politics.

From **11-20th August 2017 we are going to Lviv and Kyiv**. There we want to deal with history, politics and the influencs media has on it. For this we will meet a group of jung Ukrainians. Lectures, workshops, discussions, excursions and an exiting freetime-program is waiting for you.

The meeting is organized by a group of Ukrainian and German students which curiously waits for your application.
